During this short jam-packed month, the students in *Grade 2A* will be busy with lots of inquiry based activities. It is the international month of friendship, which we will honor with discussions, stories and encouragement on how to show love to friends. In science class, the students are learning about Hot & Cold Temperatures. Our topic in health class is nutrition. We are exploring the 4 food groups and why it is important to eat a rainbow of food each day. Please have conversations with your child about eating a balanced diet, regular exercise and the importance of getting the right amount of sleep. Continue to send your child with warm clothing for recess that are labelled. We will be celebrating Valentine's day on Friday, Feb. 14th. We will be doing a small class party, and card exchange. If you are giving out valentine's, please include a card for everyone in the class.

Valentine list

For Feb. 14th in the PM

- Basil
- Easton
- Gavin
- Jordan
- Kiet
- Sophia
- Simon
